Projects

[Inquiry](#)

<https://affectionate-almeida-c22cb1.netlify.com/>

An app designed to facilitate the scheduling, interaction, and payment between contractors and customers.

| HTML || React || Nodejs || Postgres || OAuth || GSAP |

- Utilized OAuth and passport.js for signup and login ability as default.
- Implemented standard signup and login via username and password through bcrypt and jwt tokens as secondary.
- Created scheduling between contractors and customers with data persistence through Postgres database.
- Payments and processing conducted through the stripe api.

[Sleep Tracker](#)

<https://github.com/sleep-tracker-pt>

An app for tracking sleep patterns and providing useful insights into how to achieve the best sleep per individual based on user input.

| HTML || React || Nodejs || Postgres |

- Implemented Signup, login, and authentication via JWT tokens, and Postgres.
 - Achieved data persistence through Postgres connected to the backend with Knex.js.
 - Backend built in Nodejs and Express.
-
